

# Cyber security micro-exercise report

## Responding to a ransomware attack

Prepared by: \_\_\_\_\_

Date: \_\_\_\_ / \_\_\_\_ / \_\_\_\_

## Executive summary

Our team ran a discussion-based cybersecurity micro-exercise session on the reported date using the Australian Signals Directorate's Australian Cyber Security Centre (ASD's ACSC) Exercise in a Box. This report summarises the results of this exercise and includes recommendations for our organisation to consider.

## Discussion outcomes

What we learned from running the exercise:

How our understanding of preventing this type of cyber security threat changed:

What will we look to change or implement:

## Team statements

We rated our confidence against the following statements:

	Not at all confident	Slightly confident	Somewhat confident	Fairly confident	Completely confident
Our operating systems, anti-virus and other software are frequently updated and patched.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
We make regular backups to an area other than our network (cloud or offline system) and know how to restore the files from the backup.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
We have regular and effective training in using peripheral devices (such as a USB drive) and how to identify suspicious links and unexpected email attachments.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
We have easily accessible policies and procedures in place in the event of a cyber security incident and have a clear reporting method to seek help information.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
