

Check-up: Online security at home

Did you know the average home has 17 internet-connected devices?
Online security is more important than ever!

Start by making a list of all the internet-connected devices in your home including PCs, laptops, tablets, mobiles, your Wi-Fi router/modem, smart TV, whitegoods, security cameras, heating and cooling systems, any wearables like smart watches and Fitbits, gaming consoles, speakers, baby monitors and children's toys. Then check off your list here as you complete each security task.
